Statistics presented in each table of the Review provide a monthly, quarterly and annual summary of information. When monthly data are available, statistics are displayed for the preceeding 15 months. The latest 12 months are highlighted.

Quarterly data are located immediately below the monthly figures. Generally, quarterly data are either the average of the monthly statistics or, as appropriate, the sum of monthly data. Quarterly statistics cover an approximate 4 year period. The latest quarters are highlighted.

At the bottom of the table annual figures are displayed. Depending on the statistics presented, annual data may be either the average or the sum of monthly data. The previous eight years of data are presented, with the latest year highlighted.

Below the annual data the source of the data and, as appropriate, notes regarding the table are detailed.

Retail estimates exclude the Goods & Services Tax (GST). Quarterly and annual figures may not correspond with table 8.1, due to rounding.

* Includes sales other than those listed.

Note:

The establishment of Nunavut has impacted the level of detail available for Yukon retail sales figures. As of the first quarter of 1999 Statistics Canada is no longer releasing the quarterly data on the sale of "Recreational and Motor Vehicles" in the Yukon. Statistics Canada's policy on confidentiality limits not only the smallest grouping that can be reported but also requires further suppression to prevent "residual disclosure". Under this policy, because Nunavut's numbers cannot be released due to confidentiality restrictions, and because Yukon has the second-lowest number of business establishments in this classification, Yukon's numbers must also be suppressed. The Yukon Bureau of Statistics is in contact with Statistics Canada to resolve this situation.
